Description

GIP Technology High Energy Nanosecond Erbium Fiber Amplifier Unit (AMP-EFA-NS-HE-U) is the 1.5μm band pulsed fiber laser transmitters, delivering high peak power (up to 30kW) and high energy per pulse (up to 0.35mJ) in standalone or compact modules size for long-range applications

The AMP-EFA-NS-HE-U series provides a variety of models that can operate under various operating conditions, such as pulse duration, pulse repetition frequency and energy, suitable for airborne 3D scanning and mapping, telemetry, harmonic, development (R&D) environments, and supercontinuum generation applications

The AMP-EFA-NS-HE-U does not need water cooling or replacement parts, only 110/220V AC power supply or +5V/+12/+24 DC power supply is needed to obtain high energy and high peak power pulsed laser.

In addition, these units also provide a user-friendly status monitoring via an LCD display, LED indicators, and various communication interfaces (RS232).
